

SUNRUN

Up to $10,000 toward your roof replacement[1]

SUNRUN CERTIFIED PARTNER

Replacing your roof? Let us help.

Qualified homeowners may receive a rebate after their Sunrun home energy system is installed. Your roofer handles the roof project; Sunrun will explain your energy options and any rebates you qualify for.

Over 11,000
5-Star Reviews

Over 1.1 million homes powered

With nearly 20 years of energy experience, no one has more installation expertise.

Personalized systems with smart technology

Breakthrough innovation to help you control your energy in simpler, smarter ways

The industry's most comprehensive guarantee

A Sunrun subscription provides peace of mind with repairs, replacements, and 24/7 monitoring

Solar power

- Generate your own affordable energy
- Reduce dependence on utility power

Battery storage

- Backup power for outage protection
- Store excess solar energy and use it when utility rates are highest

[1] Subsidies available and amount depend on the home, roof project, market, and eligibility for a qualifying Sunrun solar and battery agreement. The homeowner pays the roofing contractor for the roof; any approved Sunrun subsidy is paid after the solar and battery installation. A Sunrun subscription has ongoing payments. System cost, coverage, and guarantee terms vary by agreement. See terms and conditions for details.
